## Your Portals, Your Way

### Configure Custom Applications with Entity Form & Entity List

Build CRM-based, custom configured web-enabled applications with list, grid, calendar and map views, without the need for development resources or coding.

### Device Responsive - Custom Branding - Out-of-the-Box

Easily brand your portal's display templates, ready-tuned for mobile, tablet and desktop browsing using the popular Bootstrap HTML5 & CSS3 responsive design framework.

### Content Management Features Editors Prefer

Portals includes a rich web content management foundation with easy-to-use publishing tools and a comprehensive array of features like custom URLs, redirects, content security and multi-lingual support.

### On-Premise, Partner-Hosted or SaaS in the Cloud - Your Choice

Built on Microsoft's .NET Framework for Microsoft Dynamics CRM, Adxstudio Portals can be deployed on-premise, partner-hosted, or completely in the cloud with Dynamics CRM Online.

## Simple, Flexible, Affordable Licensing

### No Need to Count Seats.

Adxstudio Portals is licensed per Microsoft Dynamics CRM organization, not per user. Install it for use on-premise, at a partner-hosted facility or completely in the cloud with our SaaS option.

## Training & Community Support

### Get the Most from Your Investment.

Adxstudio offers instructor-led online and on-site training, with a wealth of helpful videos, user guides discussion forums and documentation to get you up and running in no time.

## About Adxstudio Inc.

### Adxstudio Inc. is the leading provider of web portal and application life-cycle management solutions built for Microsoft Dynamics® CRM, SharePoint and .NET platforms.

Founded in 1998, privately held, and with a staff of over 50 solution and services professionals in locations across Canada and the U.S.A., we're focused on delivering the latest, integrated, web-based solutions built for the Microsoft technology stack.
